DETAILED ACTION

Amendment

Applicant's amendment and RCE, filed 12/26/01, has been received and entered. Claims 1 and 3 have been amended.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3, and 34-37 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 3 recites a tubular socket receiver towing hitch. Applicant does not show this embodiment with the added limitations in claim 1 which claim 3 depends from.

Claims 36 and 37 recite the limitation of being adapted to be locked. The only locking mechanism disclosed has nothing to do with the folding step recited in claim 1.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

4. Claims 1, 34 and 36-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Mason.

Mason shows, figure 2, a trailer hitch locking assembly with an upper receiver 26 (step, step portion) which has a first and second positions as it is pivotally secured (hinged) to the mounting plate 12. There is a mounting aperture 14 which allows the assembly to be secured to the vehicle. The closed position does not allow the hitch to leave or enter the assembly once locked. There is a portion of the upper receiver, in both positions, which is forward of a portion of the vehicle hitch and adjacent to a rear portion of the vehicle (in as much as applicant's invention is).

Response to Arguments

5. Applicant asserts that a prima facie case of anticipation has not been established. The examiner does not concur. See rejection.
